Release date : **25.01.2002**

Selling points:

- * Very sought after first two full length albums
- * Albums have been unavailable for years
- * Toured around the world extensively
- * Considered to be amongst the leaders of the genre

Biography:

Deeds of Flesh was created back in mid 1993 by Jacoby Kingston, Erik Lindmark and Joey Heaslet. Before Deeds, we were all in different bands. We all felt that we were being held back in our other bands and we knew what we could do better together, so we formed Deeds of Flesh. After taking 3 months to write the first MiniCD entitled 'Gradually melted', we released it through various labels. It took off explosively in the underground, gaining worldwide recognition extremely fast. In late 1995, after various offers, we signed with Repulse Records for a 2 CD deal. We released our first full length CD entitled 'Trading pieces' in 1996, and our second 'Inbreeding the anthropophagi' in 1998. Due to Joey having to leave the band temporarily because of schooling opportunities, Inbreeding featured his replacement Brad Palmer. Also in 1998 we re-released a new re-mastered version of 'Gradually melted' with all new artwork. Since the release of 'Trading pieces', Deeds has toured constantly all over the world smashing heads. For the most part, the turnouts and support at our shows have been excellent. After the release of 'Inbreeding the anthropophagi', Deeds picked up X-Vile guitarist Jim Tkacz and got original Drummer (Joey Heaslet) back in the band long enough to record "Path of the weakening". "Path" has sold over 16,000 CDs so far and is the highest selling CD to date. After two crushing North American tours and many shows in between, Deeds of flesh has finished recording "Mark of the legion" once again as a three piece. Since we definately plan on having a second guitarist in the band for touring, Erik laid down the harmonies on the new album. Now, with the help of Crash distribution (US) and Pro-sonic (UK), "Mark of the legion" should surpass all previous Deeds' albums in sales and ferocity. And that concludes our latest chapter...to be continued. Due to the high demand and unavailability of the 'Trading pieces' and 'Inbreeding the antropophagi' albums, Displeased records licensed both albums from Repulse, so the complete discography of Deeds of Flesh is available again.
