Imagine there would be a band alive these days, bringing the best of what Sodom, Venom and Bathory brought in their best days, the mid 1980s!!! Forget all those fucking wanna-be retro acts, because here's AmmiT from Santiago, Chile, making your wildest thrash-ing headbanging bullet belt wet dreams come true!

Started out in 1991 as a solo project, AmmiT is the brainchild of band leader Count Ezar Yang. After several demo- and rehearsal tapes the band recorded two amazing obscure albums in 1998 and 2000 respectively, which gained a lot of positive attention of the international underground scene worldwide. The band signed with US label War Hammer Records and released a fine new full length in 2003.

After the demise of the label, AmmiT and From Beyond Productions came together and worked out a deal for new releases on FW, as well as the now presented retrospective album, capturing all tracks of the (previously only on cassette issued) albums 'Mass suicide' and 'Steel inferno', as well as 3 newly recorded raging tracks done in early 2004, to give everyone an idea what to expect of the upcoming full lengths! Total bestiality!

As said, AmmiT is a hell raging old school black thrash bastard child, mixing raw old school metal with weird and mind boggling esoteric intros and interludes, here resulting in a unique yet recognizable excellent listening experience for all who were there in the early days, as well as all newer fans of the old genre!

Gate, destruction and wrath!!!
